PROJECTS

1. uracca.com

About

An e-commerce platform for the emerging fashion brand Uracca, designed to provide an exceptional user experience and showcase the brand's latest collections.

Built with Next.js:

- Optimized for fast, dynamic user experiences and SEO-friendly architecture.
- Scalable structure to support future growth and increased user demand.

TOLLS:

- ShadCN UI: Ensured consistent and modern UI components across the platform for enhanced usability and aesthetic appeal.
- Tailwind CSS : Implemented a custom, responsive, and visually appealing design system for seamless user interaction across devices.

TypeScript

- Comprehensive type checking and error handling for robust, maintainable, and scalable code

2. krithybooks.shop

About

An online platform for buying and selling books, built to offer a seamless user experience and efficient backend operations.

Built with Nodejs/ejs

- A complete Node.js application using EJS for server-side rendering to deliver dynamic and fast-loading pages.
- No frontend frameworks were used, ensuring lightweight and optimized code for custom requirements.

TOLLS:

- Bootstrap 5 : Used for responsive styling and reusable components, providing a modern and mobile-friendly design.
- Handles all client-side interactions and dynamic features to enhance user experience.
- nodejs/expressjs enabling efficient server-side operations, routing, and API integrations.
- mongodb Used as the primary database for secure and scalable data storage,

3. ayaboo.com

About

An b2b platform for wholesale bussiness, built to offer a seamless user experience and efficient backend operations.

- Related Dashboard panels
- admin.ayboo.com
- seller.ayboo.com
- store.ayboo.com

Built with Reactjs/Vite

- A complete React.js and Node.js application.
- Optimized build using ES module-based bundling.
- Enables dynamic, client-side routing for a seamless SPA experience.

TOLLS:

- Tailwind Ui : Used for responsive styling and reusable components, providing a modern and mobile-friendly design.
- Handles all client-side interactions and dynamic features to enhance user experience.
- Redux Toolkit : Manages complex state efficiently.
- React Hook Form & Yup : Simplifies form validation and state management.
- Axios & React Query : Handles API requests efficiently.
- MUI & Radix UI : Enhances UI components with accessibility and design consistency.
